

Entouch Business Connect VoIP

The Best call for the forward-looking business-owner

What is hosted VoIP and what would make this the right choice for me?

It's easy. **Entouch Hosted VoIP allows your company higher end features and sound like a big business on a small business budget.**

For less than you would pay for normal phone lines, you can get all of the benefits of voicemail delivered to your email box, a professional auto attendant that gives callers confidence in your business, and caller ID displayed on every phone so you know exactly when to pick up the call.

And that is just the beginning. With Entouch Communications, you'll find that you now have the freedom to work from anywhere without losing an ounce of productivity. Picture it: you answer an incoming call at your home office, then transfer the call to your partner on his mobile phone. Or maybe you conference him in. Small things can make a big difference to the person at the other end of the call. The illusion that your employees and partners are all working under one roof at your corporate headquarters remains unbroken.

Don't want to be in the business of managing your own telephone system with costly upgrades, maintenance agreements, telephone company agreements, confusing contracts and major down time when something breaks! Then make the right choice and call for your Entouch Communications Hosted Solution. With our Hosted solution we take care of it ALL for one low monthly price. We include 7x24x365 monitoring and lifetime upgrades on the system and phones or as long as you keep your service with us.

Dodge the expensive system bullet

Too many people have been stung by the pain of buying similar inferior systems. Other phone systems come with a huge upfront bill, and whether you deplete your capital to make the purchase, or dig into lines of credit, the result is always the

same: you and your business become encumbered for years by an outdated, depreciating system hanging on your wall.

Don't let it happen to you. At Entouch Communications, we've made it our mission to save as many businesses as possible, and their owners, from the sting of buying an inferior system.

With Entouch Communications, you benefit from a low upfront cost and no ongoing commitments. Our customers have each saved thousands of dollars in upfront costs by using Entouch Communications instead of others hardware-based solutions. Many of our customers had resigned themselves to spending **10x to 30x** more in upfront charges to phone system vendors, support contractors, long-distance providers, and the local phone company before they discovered the Entouch Communications solution.

The Entouch Communications Solution

Pay less, get more. You deserve it, and we guarantee it with the Entouch Communications Promise: use our Hosted based service for 90 days, and if you aren't 100% happy, we'll refund all your service and setup charges, no questions asked. We don't want your money unless you are thrilled to be an Entouch Communications customer.

There is absolutely no risk. Get started with Entouch Communications today by calling 317-238-3045, or send an email to sales@Entouchcommunications.com.

Entouch Communications is the leading low cost provider of hosted phone system solutions for small businesses. Are you looking for a way to project a big image to your customers, prospects, and partners without breaking the bank? Relax. You've come to the right place. We created Entouch Communications because we weren't satisfied with the costly and inflexible options previously available to the savvy small business owner.

Smart businesses today are connecting all the places their employees work - remote offices, homes, and even the local coffee shop - all while improving employee effectiveness and responding more quickly and effortlessly to their customers' changing needs.

We understand the communication needs of your business because we are dedicated exclusively to business telecommunications. Make the Right Call to an Entouch Communications certified business specialist
